

<b>Position</b>	Technical Supervisor
<b>Facility</b>	St. Louis Aquarium at Union Station
<b>Location</b>	St. Louis, Missouri
<b>Job Summary</b>	<p>The St Louis Aquarium at Union Station is hiring! A new page is being written in the long history of St. Louis' historic Union Station. Located in what was once one of the busiest passenger rail terminals in the world, the St. Louis Aquarium at Union Station will take guests on an aquatic journey unlike any other. Opening at the end of 2019, The St. Louis Aquarium at Union Station will be an immersive and engaging experience offering unique perspectives of our underwater world. The aquarium will include one-of-a-kind exhibits featuring thousands of aquatic animals from streams, rivers, lakes and the oceans including a 250,000- gallon shark habitat as the centerpiece. The Aquarium features state-of-the-art technology, world-class animal care, as well as a strong emphasis on both education and conservation. Position: Technical Supervisor Department: Life Sciences We are currently looking for a dynamic Technical Supervisor to join our team. This role will be responsible for managing the Aquarium's maintenance/life support team to support the operation, maintenance and repair of facilities and equipment associated with live animal exhibits. Management and preventative maintenance of all life support system (LSS) equipment, including but not limited to pumps, sand filters, UV, ozone generators and other equipment that are critical to animal health.</p>
<b>Essential Functions</b>	<p>Roles &amp; Responsibilities</p> <ul style="list-style-type: none"> <li>• Support and supervise the maintenance and life support teams.</li> <li>• Assist in writing protocols and procedures to be used in the operation and maintenance of LSS equipment.</li> <li>• Assist in managing the preventative maintenance program of all LSS equipment.</li> <li>• Scheduling routine maintenance for all equipment.</li> <li>• Assigning preventative maintenance work orders to other LSS technicians.</li> <li>• Purchase and maintain inventory of supplies and back-up equipment to ensure continued operations.</li> <li>• Identify and record all maintenance performed to LSS equipment according to approved protocols and procedures.</li> <li>• Identify problems with and implement changes to system design and operation to ensure safety for guests, staff and the animal collection.</li> <li>• Ensure the safe installation, maintenance and operation of all LSS equipment, while maintaining the needs of the animals in exhibits and holding systems.</li> <li>• Perform inspections, preventative maintenance, routine up-keep, cleaning and repair of all equipment.</li> <li>• Understand water chemistry reports and their relationship to LSS.</li> <li>• Assist in the making of seawater for marine systems.</li> <li>• Monitor the Life Sciences inventory and departmental expenditure as it pertains to maintenance, in order to reduce loss/waste, control costs and accurately communicate expenses.</li> <li>• Maintain up-to-date electronic records on water quality, system maintenance and system checks.</li> <li>• Perform general facility repair and maintenance.</li> <li>• Manage emergency situations to minimize damage, loss or injury to guests, team members, animals or company property.</li> <li>• In collaboration with Guest Experience Department and the Aquarium Foundation, ensure exhibits and programs engage, educate and entertain diverse audiences.</li> <li>• Work closely with the Aquarium Foundation to ensure volunteers and educators provide exemplary guest service and engagement.</li> <li>• Other duties as assigned.</li> </ul>
